
7.0 MASTER PLAN

The Masterplan for Loseby Park has been developed as a result of community consultation and identifies numerous issues within the Reserve. Refer to Masterplan attached.

Components of the Masterplan may not occur for some years depending on funding. This Plan of Management recommends staging of the works, however the staging is dependent on availability of funding, demand and use of the facilities and review of the needs assessment for the community and user groups of the park.

Figure 11 – Masterplan
